2 of 2 review helpful Masterful synthesis of Inquisition research By M J Sweet This is a dense work that uses innumerable original documents and earlier research to provide a detailed picture of the Inquisition's origins organization and functioning and its leaders, collaborators, victims and opponents in Portugal and Spain and their empires well as in Italy. Bethencourt delineates differences in these. The Inquisition was the most powerful disciplinary institution in the early modern world, responsible for 300 000 trials and over 1 5 million denunciations. How did it root itself in different social and ethnic environments? Why did it last for three centuries? What cultural, social and political changes led to its abolition? In this first global comparative study, Francisco Bethencourt examines the Inquisition's activities in Spain, Italy, Portugal and overseas Iberian. In this important and engaging book originally published in French in 1995, Bethencourt compares and contrasts the activities of the Spanish, Portuguese and Roman Inquisitions. Highly recommended. Choice Bethencourt's scope is undeniably broad.
